

Press release

architectures & agricultures

An educational website to encourage sensitivity in the architectural conception of agricultural buildings

www.architecturesagricultures.fr

Created for designers, builders, developers and organisations involved in the construction of agricultural buildings **architecturesagricultures.fr** has the following objectives :

- To present built projects and helpful approaches which encourage an idea of quality in agricultural architecture.
- To develop levels of competence amongst those involved in the conception and construction of agricultural buildings
- To provide a forum for the exchange of ideas and experiences in relation to contemporary agricultural architecture, bringing together diverse contributions on its evolution.

architecturesagricultures.fr has, in this way, the intention to encourage, bring value to and to promote architectural quality in the domain of agricultural buildings. Created in partnership with those involved in agriculture and in construction, it is informed by studies, historical documents and bibliographic and technical research.
